This day completes all the connections between pages and to which <div> each <div> should
 be associated. And some basic buttons like back, next, start reading.

In this time period, I learned what is css file and the role played by css file in the
process of web design. Generally speaking, html file only plays the role of displaying
text, and its function is very limited, if you want the web page to become richer and
more vivid, instead of simple and boring text content.

```
nav ol{
    border:1px solid, black;
    border-width:1px 0;
    list-style:none;
    margin:0;
    padding:0;
    text-align:center;
    background: rgb(139, 142, 57);

}

nav li{
    display:inline;
    border: 1px solid white;
    border-radius: 5px;
    padding:5px;

}

nav li a {
    font-family: Arial, Helvetica, sans-serif;
    font-style: normal;
    text-decoration: none;
    font-variant: normal;
    font-weight: normal;
    font-size: 1em;
    color:hsl(0,0%,255%);
    display:inline-block;
    padding:10px;
```

During this phase I learned how to use and understand JS files, I
learned to use JS to implement simple animations such as what happens
when the user clicks a button or what happens when the mouse is
hovered, and I used the color generator to choose the right color for
my web page.

#FFFFCC	#CCFFFF	#FFCCCC

#99CCCC	#FFCC99	#FFCCCC

#FF9999	#996699	#FFCCCC

At this stage, I learned how to add relevant videos to my web pages to make them more colorful.

09/26/2022
At this stage I learned about adding some JS files to the original to make the page more enjoyable for the reader.

At this stage I realized that if my page needed to be more interactive I
needed to add some CSS files and JS files, so I was going to add a question
 and answer section to enrich the content of the page, and to help users
understand the progress of reading, I also added a progress bar.
